UV NON STOP AI SCANNER PRINTER

**[ UV NON STOP AI SCANNER PRINTER ]**

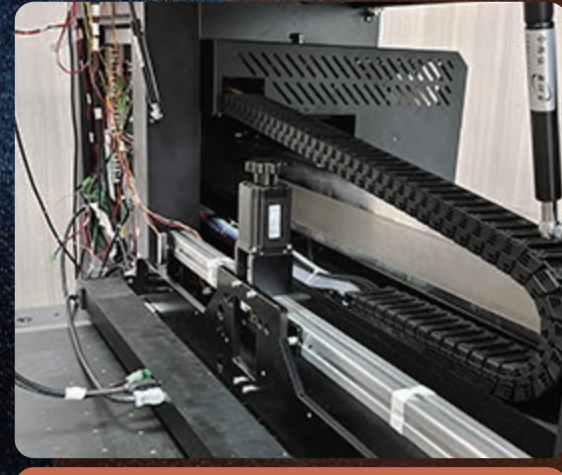

**[ UV Non Stop Ai Scanner Printer ER-HD800 ]**

- 600dpi Latest UV Ai Scanner
- Production Powerful As 2 sets 2513
- Assembly Production Line for small items

The UV Non-Stop AI Scanner Printer represents the highest level of automation in the UV flatbed printing field. If you have a large volume of standardized products that need printing, this equipment will be the ultimate tool to enhance your competitiveness.

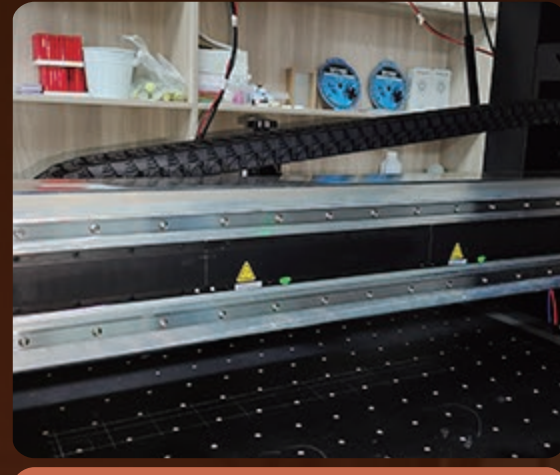

**300dpi Latest UV Ai Scanner**

300dpi ensures fast output, and AI scanning enables automated printing with almost zero preparation time.

**Advanced Lifting Capping Station Support 3 Heads**

The "lifting" design enables fully automatic maintenance, reduces manual intervention, and ensures stability and reliability in large-scale production.

**Hiwin steel guide rail**

Hiwin guide rails are made of high-quality steel and are heat-treated for high wear resistance. The sealed design effectively prevents dust, ink splashes and other pollutants in the industrial environment from entering the guide rail.

**Anti-static device is optional**

Guarantee printing quality, eliminate surface defects, ensure printing accuracy, avoid ink flying and burrs, protect printing materials, and prevent uneven adsorption.

**User-friendly projecting touch screen**

The interface design is intuitive, the icons are clear, and the logic is simple. Even non-professionals can quickly get started without complicated training.

**Equipped with latest Epson industrial i3200-U**

The printing quality is excellent, the color expression is strong, the failure rate is relatively low, and it is suitable for long-term continuous production.

**[ Product details ]**

Print Software	Photoprint
All-In-One Computer Configurations	8th Generations i7-8750H Processor, 64G/128G, 15.6-inch 1920x1080 Touch Screen
Machine Functions	600mm Belt Length, UV AI Scanner, Belt transportation system
Printing Heads	4-8pcs Ricoh G6
Machine Configurations	THK Guiderail, Leadshine Motor, Negative Capping Stations, All-In-One Computer(optional)
Printing Speed	G6 : 4pass 16 m <sup>2</sup> /h,6pass 12 m <sup>2</sup> /h
Print Colors	CMYK W V
Working Environment	2300*1610*1620 Space, 5000W Electricity Power, 25°C-30°C humidity50%-70%
Package Info	2450*2000*1850mm, 820KG, 6.85m <sup>3</sup>
