OM-OM-FLAG/SUB1302

1.3M FLAG /SUBLIMATION PRINTER

[FLAG1304 FLAG /SUBLIMATION PRINTER]

[Product Advantages]

- Direct Textile/Sublimation Paper Printer
- Intergrated feeding&take-up system
- Standard with 2 pcs officially Epson i3200 printheads

The OM-OM-FLAG/SUB1302, with a width of 1.3 meters, is specifically optimized for flags, banners, mesh fabrics, and stretch film, making it a powerful tool in the signage and advertising industry. Dual I3200 printheads ensure high speed, and when used with sublimation inks, it delivers excellent color reproduction and smooth transitions. Suitable for bulk orders, its industrial-grade design guarantees long-term continuous operation with a relatively low failure rate, making it ideal for production environments.

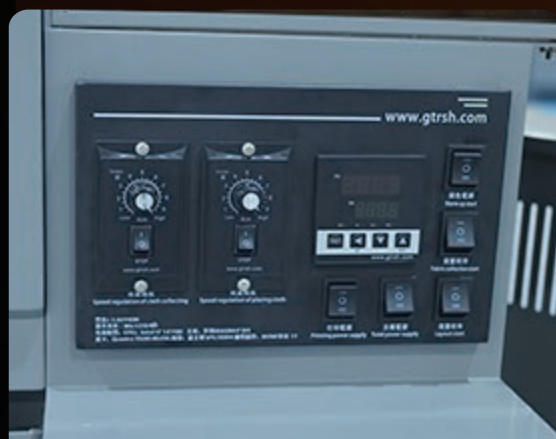

Branded Accessories Used For High Attrition Areas
The industrial-grade design ensures that the equipment can work continuously for long periods of time with a relatively low failure rate, making it suitable for production environments.

High Grade Drag Chain To Protect Ink Tube Cables
Protect these fragile and critical pipelines from wear, tear, folding, oil, and dust during millions of high-speed reciprocating motions.

Intergrated Feeding&Take-Up System
The fabric is automatically and smoothly unrolled from the roll and fed into the printing platform. After printing, the finished product is automatically and neatly wound onto another roll.

Simple -Use Power Control Board For Each Dedicated Fuction
The entire machine is divided into functional modules, and each major functional module is equipped with an independent, dedicated power control board.

The Paper Printing Device Provides Dual-Purpose Multi-Function
Having "dual-purpose and multi-functionality" is indeed a huge advantage, especially the combination of "flags + clothing", which can be called a "golden pair" and can immediately broaden your business scope.

Standard With 2 Pcs Officially Epson I3200 Printheads
Epson printheads offer inherent precision advantages, and the dual I3200 printheads guarantee speed, making them suitable for handling bulk orders.

[Product details]

Print Software	Ripprint/Phototprint
Printing Speed	2H/40m ² -2H/60m ²
Print width	1200mm
Printing Heads	2pcs Epson I3200 Print Heads
Stepper motor	KAMEILO
Servo Motor	Leadshine
Ink Type	Sublimation ink
Print Colors	CMYK
Working Environment	2450*700*1450mm, 2000W , Temperature 17°C--23°C, humidity 40%-50%
Package Info	2660*900*1550mm ; 350kg

[Application Scheme]
