UV9060PRO

9060 UV FLATBED PRINTER

【 UV FLATBED PRINTER 9060 PRO 】

【 9060 UV Flatbed Printer】

- Hot stamping crystal label application
- Anti-collision system
- Lack ink alarm system

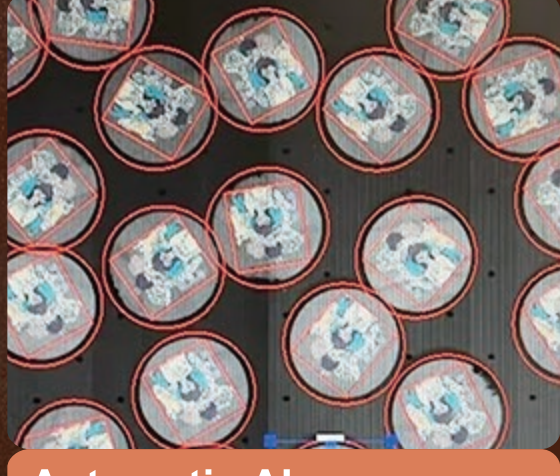

The OMAJIC UV flatbed printer 9060Pro is an industrial-grade digital printing device. The "9060" in its name represents its maximum print size of 90 cm x 60 cm. This model is very popular in industries such as advertising processing and **personalized customization** due to its moderate size and powerful functions.

Automatic media height detecting system is equipped

Some roll materials (such as soft film and canvas) are 91.4cm (36 inches) wide, and the 90cm design can cover most needs.

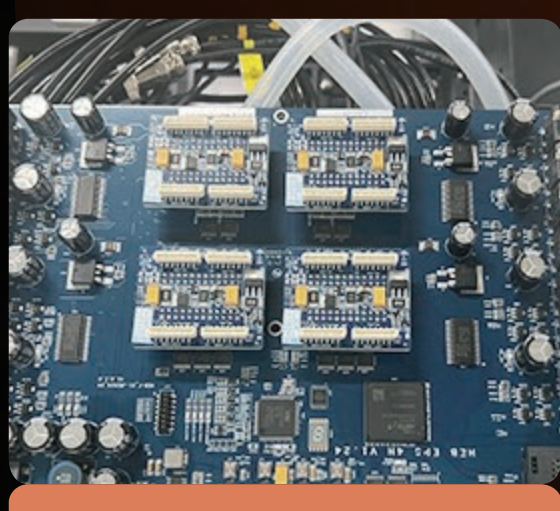

Automatic AI scanner positioning function

The anti-collision system monitors the distance between the nozzle and the medium in real time, and stops or lifts the nozzle before a possible collision to avoid physical damage.

Anti-collision system is equipped

The anti-collision device detects and stops movement in time through sensors or mechanical limiters to prevent the print head from hitting the platform or other components.

Hoson Boards

The printhead movement is controlled by micro-step subdivision technology, with a resolution of $\pm 0.01\text{mm}$.

One-time molding aluminum beam ensure the high accuracy

High strength, 50% lighter than steel, reducing motor load and improving acceleration. Honeycomb/grid reinforcement may be used inside to improve bending rigidity, bearing capacity can reach more than 100kg

Negative Ink Supply System

The negative pressure value is dynamically matched with the ink gravity, viscosity and inkjet requirements to ensure continuous and stable ink supply.

【 Product details 】

Print Software	Photoprint/Maintop
All-In-One Computer Configurations	8th Generations i7-8750H Processor, 64G/128G, 15.6-inch 1920x1080 Touch Screen
Machine Functions	One-button automatic cleaning system, AI visual scanning positioning system, Z-axis automatic height measurement
Printing Heads	4pcs Epson I3200-U1
Machine Configurations	Hiwin Guide rail,Leadshine Motor, All-In-One Computer(optional)
Printing Speed	4*i3200A 4pass:10 m ² /h,6pass:8 m ² /h
Print Colors	CMYK W V
Working Environment	2000*1420*1045mm Space, 4500W Electricity Power : 22°C-28°C humidity40%-60%
Package Info	2140*1660*1160mm,4.12m ³

【 Application Scheme 】
